System Requirements:

NotifyLink:

The Enterprise Server for IMAP4 requires three components to be installed the SQL Database, Web Server and a Messaging Server. Requirements will vary depending on the component being installed. With NotifyLink's flexible architecture, these components may be installed to one server or may be distributed across multiple Servers. The components and their respective requirements are as follows:

- Microsoft Windows 2003/2008 Server, Support for 32 & 64Bit Processors
- Support for Virtualization
- Intel Pentium III processor or better
- 2GB RAM
- 10GB free hard drive space
- Microsoft SQL Server 7.0 or later (SQL Server 2005 may be used for smaller deployments)
- Microsoft Internet Explorer 4 or later
- Microsoft IIS 4 or later
- Port 80 inbound/outbound open
- Email Port 143 / 443, PIM Port 80

* Most Nokia Series 60 3rd Edition devices are supported. The device must be running Symbian OS versions 9.1 or later.

** See the list of Android devices that have been certified using TouchDown at www.notifycorp.com

Administration

- Simplified 1-Click Installation for single server deployments
- Improved Administration Interface
