

NotifySync for

Microsoft
Live@edu

BlackBerry

NotifySync™ for Live@edu.

**Directly connect your BlackBerry to your
Live@edu email via ActiveSync.**

Notify Technology is happy to be a wireless mobility partner to Microsoft's Live@EDU customers. Microsoft understands that students and faculty need cutting edge communications and collaboration tools while saving time and money. Live@EDU is built on Microsoft Exchange 2010 and provides mobile users with a mobility interface based on Microsoft's Exchange ActiveSync technology. That means you can use a variety of today's smartphones with Live@EDU. Notify's NotifySync solution for BlackBerry provides users who want to use a BlackBerry smartphone as their mobile device for synchronizing to their Microsoft Live@EDU email account.

By using the Live@EDU service organizations are reducing their overall costs in offering email and collaboration services to their students and faculty. In attempting to continue to provide cost cutting solutions, Notify is proud to offer Live@EDU users a special pricing for its NotifySync for BlackBerry solution. NotifySync, the simple direct connect client application that provides secure wireless email, calendar, contacts and task synchronization between your BlackBerry and Live@EDU account.

The NotifySync solution can support a variety of network options including Wi-Fi. The licensing of NotifySync is based on a nominal annual fee which also covers support and maintenance

The NotifySync™ solution provides Live@edu organizations of all sizes secure, real-time, wireless synchronization of email and PIM to and from any BlackBerry.

In addition, NotifySync supports any BlackBerry device on all popular cellular voice and data networks as well as any 802.11x wireless network.

With NotifySync, users have the ability to compose, reply, forward, or delete their email while mobile. A variety of email attachment formats is supported as well. Email folder synchronization, including sent, draft, and trash folders, are all configurable on the BlackBerry. The user can also configure the frequency at which they receive messages and the synchronization date range, which serves to control the quantity of messages kept on the BlackBerry. Support for accepting or declining meeting invitations is also available, as well as remote access to the organization's Global Address Book. Users can also configure how messages are cleaned up on a daily, weekly, or monthly basis.

The NotifySync solution utilizes a "direct push" or "scheduled push" connection when connecting any BlackBerry to the user's email platform. With NotifySync all email, calendar, contact, and task information will be stored safely behind an organization's firewall while all data-in-motion is encrypted utilizing SSL. Should a user lose their BlackBerry, a remote wipe can be initiated to ensure all information on their BlackBerry is erased.

For more information on NotifySync for BlackBerry, please contact sales@notifycorp.com.

¹ Utilizes ActiveSync for direct connect to email platform.
